Standard delivery

LEVELFIX CL202R

Art.nr. 556120

Including multifunctional mounting base, target plate, batteries and pouch.

Set with 1.5mtr tripod: Art.nr. 556220

LEVELFIX CL202G

Art.nr. 556122

Including multifunctional mounting base, target plate, batteries and pouch.

Set with 1.5mtr tripod: Art.nr. 556222

LEVELFIX CPL206G

Art.nr. 556128

Multifunctional mounting base, target plate, batteries and pouch.

Set with 1.5mtr tripod: Art.nr. 556228

cross lasers

LEVELFIX
INSTRUMENTS

LEVELFIX 200 Series
Professional cross lasers

X *200 Series* Professional cross lasers

Professional, reliable and compact

The 200 series from LEVELFIX consists of professional and robust cross / point lasers.
These lasers are equipped with extra wide, bright laser beams (red or green).
In addition, there is the unique combination of cross line and 5 point laser.
This allows you to quickly and easily determine all angles and levels.

COMPACT, HIGH-QUAIITY AND CLEARLY VISIBLE
The 200 series consists of high-quality and compact cross lasers. The lines are clearly visible and the beams can be switched on separately and simultaneously. The pendulum system ensures that the instrument is perfectly level. If the instrument is not set up correctly, the lines flash.
The self-leveling system can also be switched off, so you can project all desired angles.
With a laser detector, which is optionally available, the lasers can also be used outdoors.

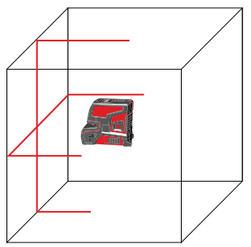
3 MODELS, FOR EVERY USER
The 200 series lasers are versatile due to a precise, clear cross line (CL202) or the unique combination cross line and 5 laser points (CPL206) for easy angle plotting.
The CL202 is available with red (R) or green (G) lines and the CPL206 with green (G) lines.

Using a high-quality and stable green laser diode, the CL202G and CPL206G have a extremely high visibility and excellent for all indoor applications.

4 YEAR WARRANTY
Our warranty highlights the quality and reliability of our products. LEVELFIX lasers come with a 4-year manufacturer's warranty*.

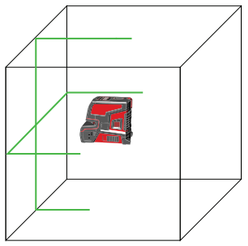
Should an instrument fail due to manufacturing or material defects, we will repair or replace it without charge.

(after registering via the internet within 8 weeks of purchase.)*



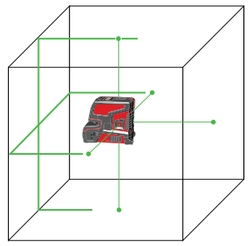
LEVELFIX CL202R
Cross laser with red beam

- Projects horizontal (>190°) and vertical red line
- Up to 20 m working range, 80 m with detector (optional)
- Accuracy 2.0mm/10mtr.
- Laser class 2M High Power
- IP 54 construction
- Complete with multifunctional mounting base



LEVELFIX CL202G
Cross laser with green beam

- Projects horizontal (>190°) and vertical green line
- Up to 30 m working range, 80 m with detector (optional)
- Accuracy 2.0mm/10mtr.
- Laser class 2M High Power
- IP 54 construction
- Complete with multifunctional mounting base



LEVELFIX CPL206G
Cross 5 point laser with green beam

- Projects horizontal (>190°) and vertical line
- Projects 5 points under 90°
- Up to 30 m working range, 80 m with detector (optional)
- Accuracy 2.0mm/10mtr.
- Laser class 2M High Power
- IP 54 construction
- Complete with multi-purpose mounting base

X *LLD200GR* The new LEVELFIX detector *(optional)*

LEVELFIX LLD200GR
Robust detector for lasers with visible red and green beam

The LLD200GR is suitable for red and green line lasers with detector (pulse) mode and has a working range of ≥80M metres.

The detector features a large receiving window (80mm), clear display, two strong magnets, adjustable sound level, two accuracies (1mm/2mm), impact-resistant housing and is waterproof (IP66).
