

LEVELFIX

LASER INSTRUMENTS

X LEVELFIX CCL680G
All-in-one multi line laser

X CCL680G All-in-one multi line laser

Features

- The universal allround laser with the best visible beam
- Removable levelling foot with 360° fine adjustment
- Removable Li-ion battery
- HighPower+ laser beam for best visibility
- Option: detector LLD200GR - range ≤ 80m

Standard delivery

- CCL680G with rotation base
- Magnetic wall mount
- Li-ion battery and charger
- Target plate and laser glasses
- In sturdy case

Description

All-in-one multi line laser

The adjustable foot with 360° fine adjustment makes it possible to precisely align the CCL680G. The graduation makes it easy to set out any angle. The adjustable foot is removable so that the CCL680G can be easily placed on a tripod or holder without adapters. The supplied magnetic base and wall mount ensure that the instrument can be placed quickly and easily on the wall or metal surface.

Complete and robust

The CCL680G is a robust and accurate laser equipped with high-quality components and fine specifications, a 4-year warranty* and the necessary accessories to get started right away.

HighPower+ green diodes with SuperBright mode

The laser is equipped with the latest HighPower+ diodes. These are even more visible and with the unique SuperBright mode, the diodes can be given even more power so you are assured of good, sharp and strong laser lines that are up to 4x more visible than the classic red diodes. By using 4 separate diodes for the 90° lines, they are even more visible than lasers with cone technology. This makes the CCL680G the laser with the best visibility in the market.

Li-ion technology

The laser comes complete with a powerful, detachable Li-ion sliding battery and charger.

Detector function

The laser has a detector function. This allows you to use the laser in combination with a LEVELFIX detector at longer distances or outdoors, even if the line is no longer visible. With a detector, the lines can be detected up to <80m.

LEVELFIX Connect

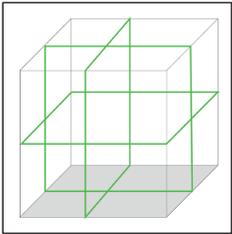

The smart communication between your smartphone and your LEVELFIX laser. With the LEVELFIX CONNECT app, you easily connect the laser to your smartphone. Once connected, you can, among other things, control the laser remotely or adjust the laser power. The functionality of the app will be further developed in the near future.

About LEVELFIX™ Smart Precision Tools - Innovative, accurate, robust and 4 years warranty*

With more than 25 years of experience and knowledge behind LEVELFIX lasers, they are manufactured with the utmost care and precision.

LEVELFIX has the best price-quality ratio on the market, guaranteeing you the best value for your money.

* Extend the standard 1 year warranty to 4 years by registering your laser via internet within two weeks of purchase.

Article number	556156
EAN	8712423015715

Set with P150IL tripod

Article number	556256
EAN	8712423015722

Specifications

Range	≤ 40m / detector ≤ 80m
Accuracy	2mm @ 10m
Functions	360° horizontal, 4 vertical lines and downpoint
Laser class	525 nm / Class 2M (green HighPower+)
Operating time	≤ 8 hours - all lines
Construction	IP 54
Rechargeable	Yes - Li-ion battery pack
